Ethan Hawke is Troy, Leilana's womanizing best friend and perennial slacker. Co-written and directed by Adolfo Aristarain, the movie explores the idea of identity and finding yourself from the perspective of Hache, who debates between two cities and two different chances at life. She also has a relationship with Michael and tries to understand whether a sort of platonic friendship with Troy is all there is to them. And that's what you miss, but it fades away," says the expat Martin. All that while Rob tells the audience about his top five breakups. Martin (Hache) (1997) Juan Diego Botto and Eusebio Poncela in "Martin (Hache)." Photo Courtesy: Strand Releasing/Everett Collection Let's add a Spanish-Argentinian co-production to the mix. They meet on a Eurail train and decide to disembark in Vienna and spend one night together chatting and getting to know the city — and one another. Algebra in Everyday Life You may have heard people say that you'll never use algebra in your everyday life, but you'd be surprised at how often you use algebra. Winona Ryder, Kim Walker, Lisanne Falk and Shannen Doherty in "Heathers." Photo Courtesy: New World/Everett Collection Granted, the big hair and bigger shoulder pads the Heathers sport here are reminiscent of a soon-to-be-outmoded '80s look. McGregor plays Trenton, a 26-year-old living with his parents who has no prospects in life whatsoever. You can use algebra to figure out the dimensions of a room or even as you make up your shopping list. Add four to itself, and you get 8. Podesev Sole: Rubber - a material that is very...Read more New York, a little bit of punk, a little bit of the 90s, a lot of energy and colorful chaos. Modern scholars have found even more complex equations that algebra can solve. Waves, perfect tans, surfer culture, people jumping out of planes with and without parachutes, and precise 90-second robberies make for a movie about discontent and following a dream. Do the Right Thing (1989) Rosie Perez and Spike Lee in "Do the Right Thing." Photo Courtesy: Everett Collection Spike Lee wrote, directed, produced and even had a role in this movie set on a scorching summer day in Brooklyn. Stacey Dash plays Cher's best friend, Dionne, and Brittany Murphy is Tai, the new girl in school and Cher's new project — Cher feels Tai needs a makeover and better taste in boys. These quantities are called variables, and you can figure out what those variables mean when you use algebra. Equations are like sentences that explain the relationships between numbers and variables. There's also a storyline in which the teenage Cher ends up being attracted to her college-aged ex-step-brother Josh (Paul Rudd), which hasn't necessarily aged well. Therefore, 2 squared plus 2 squared equals 8. MORE FROM ASK.COM To use another example, let's see what happens when x equals 3. A Brief History of Algebra Since ancient times, mathematicians have worked with unknown variables in different ways. But J.D. definitely has a more wicked side than Veronica could have imagined. Clueless (1995) Alicia Silverstone and Stacey Dash in "Clueless." Photo Courtesy: Paramount Pictures/Everett Collection This modern-day take on Jane Austen's Clueless was set in 1990s Beverly Hills and written and directed by Amy Heckerling. Generation X icons Christian Slater and Winona Ryder star in this dark comedy about high school cliques and bullying that became a cult classic. Pump Up the Volume (1990) Samantha Mathis and Christian Slater in "Pump Up the Volume." Photo Courtesy: New Line/Everett Collection Christian Slater finds himself in high school again in this teenage movie where he plays Mark Hunter, a nerdy, shy teenager dealing with a double life. When you solve an equation in algebra, you break it down to its simplest form and discover what the variables mean. Algebra can also help students with critical thinking and logic skills. Alicia Silverstone plays the ultra-rich and privileged Cher, one of the most popular girls at her high school. He's J.D., the mysterious and eternally-clad-in-dark-colors-and-grungy-plaids new student in Veronica's high school. They called this type of math the "science of restoration and balancing," and the Arabic word for "restoration," or "al-jabru," became the root word for the word "algebra." As mathematicians in the Middle Ages experimented with the principles of algebra, they realized they could solve equations for two- and three-dimensional items, which led to even more discoveries of what algebra could do. She has a good heart, but she's clueless when it comes to not judging a book by its cover. Kravitz's real-life mom, Lisa Bonet, played a role in the original movie. Putting algebra to use in your everyday life can help you in so many ways. You figure out what the variables in an equation are by solving it. And let's see what — other than cynicism, angst, ripped jeans and grunge music — defined the disaffected generation that gave us Winona Ryder, Ethan Hawke, Julie Delpy and Keanu Reeves. Algebra is a versatile form of math that you use more often than you might think and, sometimes, you don't even realize that you're solving math problems. Lelaina is videotaping Troy and their friends Vickie (Janeane Garofalo) and Sammy (Steve Zahn), pursuing her passion for documentaries and trying to capture the struggles of her generation. "Why Can't I Fall in Love" performed by Ivan Neville and "Everybody Knows" by Leonard Cohen make for a very timely soundtrack that also boasts themes by Pixies and Sonic Youth. Ben Stiller, who also directed the movie, plays Michael, a convertible-driving yuppie who works at an MTV-like TV station. Also, Hulu recently adapted this story in the form of a TV show set in current-day Brooklyn starring Zoë Kravitz as Rob. Algebra uses symbols — in most cases, letters — to represent quantities that don't necessarily have the same value all the time. The romantic film is basically a series of conversations between the two young people and their reflections on life. Plus, Keanu Reeves perfects the art of the cocky one-liner with dialogue like "The FBI is going to pay me to learn to surf?" and "I caught my first tube this morning, sir." Reality Bites (1994) Ethan Hawke and Winona Ryder in "Reality Bites." Photo Courtesy: Universal/Everett Collection If we had to choose just one movie to encapsulate how Generation X felt in the '90s, it would probably be this one. Algebra comes in handy when you're trying to figure out how much a group of items costs per item. Svrsek Upper: Textile - is a lightweight material, which is offered in a very wide color scale and is mainly used for summer footwear. When teenager Hache (Juan Diego Botto) overdoses in Buenos Aires, his fed-up mom decides it's time for him to spend some time with his dad Martin (Federico Luppi) in Madrid. When the owner of the Italian-American pizzeria in the heart of the film's majority Black neighborhood refuses to hang pictures of Black leaders on his Wall of Fame, conflict arises. If x equals 2, then x squared, or x times itself, equals 4. Lee managed to capture the discontent and struggles of a younger generation while portraying police brutality and the many intricacies of race relations. All of this and a little bit more are the models from the Converse and MadeMe collaboration. Martin and Hache have long conversations about literature and the meaning of longing for your home country. Whether you pick a corduroy or suede version, these One Stars won't get lost in the crowd. Upper - Textile ■ - is a lightweight material, which is offered in a very wide color scale and is mainly used for summer footwear. Sole - Rubber - a material that is very easy to maintain and you will appreciate it especially in rainy weather. Size charts ConverseReference: 561393C Upper: Textile, Sole: Rubber ColorwayVibrant Yellow/White Gerd Altmann/Pixabay If you're trying to figure out what x squared plus x squared equals, you may wonder why there are letters in a math problem. Academy Award-winner Kathryn Bigelow directs this action-caper in which the undercover FBI agent Johnny Utah (Keanu Reeves) infiltrates a group of surfers led by Bodhi (Patrick Swayze) while trying to identify a band of bank robbers believed to be surfers. When you're trying to figure out how to split a restaurant bill or how much gas you can buy for a certain amount. In that case, x squared equals 9. High Fidelity (2000) Jack Black, Todd Louiso, John Cusack and Lisa Bonet in "High Fidelity." Photo Courtesy: Everett Collection Let's wrap things up with this story based on a Nick Hornby novel and directed by Stephen Frears. She's Veronica, the only non-Heather among the mean and popular Heathers. But through them, we listen to all sorts of good tracks like "Dry the Rain" by The Beta Band and "Oh! Sweet Nuthin'" by The Velvet Underground. Hache, who his parents think may have tried to commit suicide, doesn't do much and is primarily obsessed with his ex, his guitar and getting high. The beauty of this equation is that x can equal anything, and you can solve it using whatever value you want for x. To find out what x squared plus x squared equals, you have to multiply x times itself. Winona Ryder plays Lelaina, a valetictorian right out of college who's trying to navigate her life as a grown-up and who wants to have a career as a documentarian. That's because, in the case of an equation like this, x can be whatever you want it to be. Before Sunrise (1995) Julie Delpy and Ethan Hawke in "Before Sunrise." Photo Courtesy: Columbia/Everett Collection Richard Linklater (Boyhood) directed and co-wrote this tale about the American tourist Jesse (Ethan Hawke) and the French Céline (Julie Delpy). Not for nothing, Gen X has been accused of skewing white and straight and of overrepresenting white, college-educated twenty-somethings. By night Mark is the host of a pirate radio station in which he engages in long, angst-ridden monologues about how "all the great themes have already been used up, turned into theme parks" and how he doesn't look forward to the future because the '90s are a "totally exhausted decade where there's nothing to look forward to and no one to look up to." No one knows who the voice on the radio is, but Mark's words sure pique the attention of the rebellious Nora (Samantha Mathis), who also happens to be his crush. Be advised that, when it comes to representation, this list could look like it lacks a bit of diversity. John Cusack plays Rob, the heartbroken owner of an independent record store in Chicago. She has a thing for him and realizes he's also very much into her. Other than its commentary on how to choose life in an overwhelming world of consumerism, the movie also has the kind of soundtrack — with themes by Iggy Pop, Blur, Lou Reed and Elastica — that would become a referent in itself. Math that Uses Letters We call mathematics that uses letters to take the place of different values algebra. Rob and his employees — the brazen Barry (Jack Black) and the knowledgeable Dick (Todd Louiso) — take melomania and musical snobbishness a tad too seriously. Trainspotting (1996) Ewan Bremner, Jonny Lee Miller, Ewan McGregor and Robert Carlyle in "Trainspotting." Photo Courtesy: Miramax/Everett Collection Danny Boyle directed this movie and basically put on the map actors Ewan McGregor, Kevin McKidd, Johnny Lee Miller and Kelly Macdonald. "Your country are your friends. Using algebra is like exercise that helps make your brain stronger. Why It's Important to Learn Algebra Learning algebra is important for more than just solving equations. But Clueless is still a classic when it comes to advanced '90s tech (brick cell phones and software that coordinates your outfits), fashion (matching plaid skirts and blazers!) and slang. Let's go over a few of the movie titles released when Gen Xers were coming of age and learning how to grapple with grown-up life and tedious, underpaid 9-to-5 jobs. Then, 9 plus 9 equals 18. Then you add that number to itself to get your final answer.Examples of X Squared Plus X Squared Here are some examples of that equation to make it easier to understand. Educators consider algebra the gateway to higher forms of math, so if you or your child wants to explore a career in science or technology, algebra can unlock so many more new ideas. We strived for some balance with the selection. In true Linklater fashion, the filmmaker reunited with Delpy and Hawke every decade for the sequels Before Sunset (2004) and Before Midnight (2013) that further explore the relationship between Jesse and Céline. Islamic scholars began to give the science of working with variables a name. MORE FROM REFERENCE.COM Steve Zahn, Winona Ryder, Ethan Hawke and Janeane Garofalo in "Reality Bites." Photo Courtesy: Universal/Everett Collection Apathetic, detached slackers... Generation X — the one that falls between Boomers and Millennials and whose members are born somewhere between 1965 and 1980 — hasn't always been characterized in the nicest terms. The brands have created unique women's sneakers that make the guys jealous. The series sure has more diversity than the original movie and is worth watching for many reasons, but the perfectly curated soundtrack is a big one. Based on an Irvine Welsh novel, the movie follows a group of friends and heroin addicts living in the suburbs of Edinburgh. Point Break (1991) Keanu Reeves and Patrick Swayze in "Point Break." Photo Courtesy: 20thCentFox/Everett Collection This one is certainly the most adrenaline-fueled title on the list.
